| **Unearthing Cultural Gems: Using Literacy to Bridge the Learning Gaps for Multilingual Learners**
  Dr. Denise Furlong
As we collaborate to engage our learners with diverse needs in authentic literacy experiences, we are empowering them to find their voices and make themselves heard. Through literacy, we make connections that bridge cultures, languages, and unique perspectives as we “mine the hidden gems” of literacy together. In this session, we will discuss ways to consider meaningful literacy experiences in which all learners will find General

| **Supercharging Literacy in Learning-Challenged Students: Mixing in Executive Functioning Mojo and Support Superpowers**
  Christine Powell
The session focuses on the connection between literacy development and executive functioning skills. By recognizing this link, educators can implement successful strategies to aid students with learning challenges, ultimately leading to student gains. |

| **Beyond the Wall: How to Use an Informal Assessment to Build a Sound Wall**
  Keegan Wilson
Are you wanting to implement a sound wall but you are unsure where to start? In this session, we will use an informal assessment to build a sound wall. We will look at informal assessments and how those can be used in upper elementary to middle school to identify sounds that aren’t yet mastered. We will use the assessments to identify the sounds that need to be taught. We will then have an |

| General | Creating Diamonds from the Rough (Drafts): Using Technology and AI to Build Competent and Confident Writers  
Rebecca Rundlett, SCDE  
David Leshock & Cynthia Goodman, HMH |
|---|---|
| Transitioning from TDA to Text-Dependent Writing on State Summative Assessments  
PK, Elementary, and Middle Transitioning from TDA to Text-Dependent Writing on State Summative Assessments  
Rebecca Rundlett, SCDE |
| Pearls of Wisdom: Diving into Powerful Insights with AI in the Science of Reading Classroom  
Angela Wolfe & Cynthia Goodman, HMH |

Join representatives from the SCDE for an overview and timeline of the transition from text-dependent analysis (TDA) to text-dependent writing (TDW) on SC READY and EOCEP. The overview will include insight to the new TDW Scoring rubrics and how they connect to the 2023 SC CCR ELA Standards. Also, participants will receive writing support for ML students and GT students.

We will explore how using technology with AI, can provide focused feedback for students to build a community of capable writers. We will see that AI can assist, not replace, teachers and provide targeted feedback throughout the writing process. Technology can facilitate in-depth and feedback opportunities so that students can work through drafts of their papers and focus on revision. AI-enhanced feedback can also free up teacher time and thus allow for more, and richer, writing experiences.

In this session, we will dive into the transformative synergy shaping modern education: Science of Reading, Artificial Intelligence (AI), and the crucial role of teachers. AI enhances learning, but the teacher’s role remains paramount at the heart of the classroom. Discover how AI supports teachers, easing administrative burdens, and empowering them to use research-based practices to guide students towards improved reading skills.
## Middle and High

**Promoting Success for MLs in the General Education Classroom**  
Dr. Bobbi Siebert, Furman University & Melissa Oliver  

This session will focus on interactive instructional practices for meeting the language & academic needs of all students, especially Multilingual Learners (MLs). Participants will leave with a variety of ideas and strategies for planning and implementing strategic language-based instruction that assists with promoting language and literacy for MLs in the content areas, along with visible learning practices grounded in evidence-based principles (Fisher, Frey, and Hattie, 2016). This session is designed for K–12 content teachers, administrators, and other educators of MLs.

## General

**So, they can decode. Now what?**  
Katilin Martz  

This session will discuss the importance of inquiry-based learning and highlight the benefits for students who are receiving special education services for a specific learning disability in reading, students who are currently in the MTSS process, and students who are at-risk for weaknesses in language comprehension. This session will demonstrate the need for inquiry-based learning as a strategy for reading comprehension in grades 3–5 (and above).

## PK and Elementary

**Mining the Hidden Treasures of Grammar Instruction**  
Travis Leech  

Discover an innovative instructional method for teaching grammar. Join Travis Leech, co-author of Patterns of Power for Middle and High School, as he facilitates experiencing this. Learn how it fosters confidence, language convention understanding, and a safe, social classroom environment through conversation, collaboration, and inquiry. Engage in transformative teaching that goes beyond standards.

**Personalized Writing Instruction for Educators: SC Writing Improvement Network Micro-Credentials**
Floyd Dinkins & Elizabeth Scarbrough

In this pre-conference session, educators will have an opportunity to select a micro-credential to complete. The micro-credentials are free to educators through the SC Writing Improvement Network (SC WIN). The session will also serve as a micro-credential workshop for educators to start their micro-credential with support persons present and available to assist. Limit of 50 participants. Upon successful completion of their micro-credential, educators earn 12 renewal credits for recertification.

**Register for the 48th Annual Conference Today!**
February 22–24, 2024

Pre-Conference Keynote (10:30 a.m.–12:15 p.m.)

*Is There a Doctor in the House? We Have an Emergency! Using Literacy to Eradicate Poverty*
Dr. Stephen Peters

Dr. Peters strongly believes poverty is the enemy of education, but literacy is the vaccine for poverty. His message will highlight the progress districts and schools are making by creating better conditions for teachers, staff, and students. Dr. Peters will share specific strategies with the audience that can be implemented immediately. He will also challenge us to understand that every level of progress will require a different version of all of us.

General

Pre-Conference PM Concurrent Sessions (1:40–2:40 p.m.)

*The A−L−E in Literacy: Developing Authentic Learning Experiences for Multilingual Learners*

Dr. Denise Furlong, Featured Speaker

As we collaborate to engage our learners with diverse needs in authentic literacy experiences, we are empowering them to find their voices and make themselves heard. Through literacy, we make connections that bridge cultures, languages, and unique perspectives as we “mine the hidden gems” of literacy together. In this session, we will discuss ways to consider meaningful literacy experiences in which all learners will find representation and senses of belonging.

General
### Supercharging Literacy in Learning – Challenged Students: Mixing in Executive Functioning Mojo and Support Superpowers

Christine Powell

The session focuses on the connection between literacy development and executive functioning skills. By recognizing this link, educators can implement successful strategies to aid students with learning challenges, ultimately leading to student gains.

### The Can Do: Using the Known to Teach Readers and Writers

Beth White, Literacy Consultant, LLC & University of South Carolina

It’s often easy to focus on what readers and writers can’t do. Changing the lens to notice and name what they can do has to happen. What’s in their known? Naming what readers know and can do informs responsive teaching. Linking the known to the Zone of Proximal Development is key. A professional goal of this session is for teachers of readers and writers to notice and name what is in their own known and to recognize areas where they need to add to their knowledge base and instructional tool belts to provide feedback in the midst of the moment with their readers and writers.

### Creating Diamonds from the Rough (Drafts): Using Technology and AI to Build Competent and Confident Writers

David Leshock & Cynthia Goodman, HMH

We will explore how using technology with AI, can provide focused feedback for students to build a community of capable writers. We will see that AI can assist, not replace, teachers and provide targeted feedback throughout the writing process.

*Today, I Think I'll T.E.A.C.H. - Lifting our Children Up from the Outside In*

Dr. Kim Johnson, Everyday Coaches

This interactive workshop will engage participants in activities to motivate and empower all learners. Through a creative approach toward literacy, we can begin to teach our children to appreciate challenges and love to learn. This workshop will show how simple yet engaging activities can lead to cognitive strength that can ultimately foster more focused success. This session will also share with participants activities that can foster critical thinking, problem-solving, and more fun in the setting.

PK and Elementary
Discover the Treasure Map to Literacy Success: Help Your Students Read Like Writers and Write Like Readers
Nicole Nelson, Learning A to Z

Successfully reciprocating reading and writing instruction and ensuring comprehension is key to student literacy success but is very hard to do in the classroom. We have a secret – it’s possible to do it and do it well. Discover how reading and writing can be used together to accomplish key learning goals. Learn how Scarborough’s Reading Rope and the Writing Rope weave together to form comprehensive literacy. Witness how to apply these concepts in your classroom and fit it all into your day.

Literacy Centers: Students Leading Their Own Learning
Nancy Breeyear

Literacy Centers are Instructional Gems! Explore literacy centers that are standards aligned and investigate the use of multisensory hands-on materials. Examine how differentiated centers can increase student engagement and encourage student achievement. Learn how strategies can be taught, practiced, and assessed within student skill levels. See how using flexible literacy centers in your classroom can make independent student work time more successful for everyone!

Primary and Elementary

Word Walk Plus: Developing Young Children’s Vocabulary through Explicit Instruction and Extension Activities
Katrin Blamey & Katherine Beauchat
This session will describe an instructional procedure for explicit vocabulary instruction in the context of storybook reading designed specifically for young children. The presenters will present the research base for the vocabulary protocol, called Walk. In addition, presenters will discuss how to implement the instructional sequence and outcomes of using the protocol with preschool children from diverse backgrounds, including a large population of English Language Learners.

PK and Primary

What Does the Science of Reading Mean for Content Area Teachers (4–12)
Katherine McKnight, Short Short Big

Science of reading research has become increasingly popular for raising adolescent reading comprehension in the subject areas. This research is based on the belief that literacy is a complex set of skills that need to be taught explicitly and systematically. When focusing on comprehension, science of reading research suggests that teachers provide explicit instruction in genre-specific strategies, such as summarizing, note taking and inferencing.

**Fairy Tale Family Feud**  
Tim Lowry

Lay a foundation for reading comprehension with magical tales! In game show format, teaching artist Tim Lowry discusses the importance of fairy tales and helps you polish your storytelling skills, capture students’ attention, and give them a solid foundation for understanding more complex story structure and vocabulary. Bonus – A fairy godmother will provide FREE STUFF!

**General**

**Low Stamina Readers and Writers? Here’s How to Turn It Around**  
Berit Gordon, Featured Author (Sponsored by PSLA)

An essential way for students to get better at reading and writing is to read and write more. The ones doing the most (as shown by educators from Dewey, Montessori, Vygotsky, Fisher, Frey, Daniels, Harvey, Hattie, and more) are the ones learning the most. But simply handing over the reins is rarely that easy. Students are experts at avoiding what they don’t feel good at, and many have reading and writing muscles that atrophied or never became robust in the first place. They need help, and so do we!

This session will provide practical, high-impact strategies to get readers and writers to do more. We will look at small and big moves that engage students, welcome even the most reluctant readers and writers, produce high volumes of work, and allow us to work with students and offer feedback while others are busy reading and writing. Just because students read and write more doesn’t mean that teachers need to spend more time on feedback. We’ll also look at ways to boost volume without increasing grading time. Teachers will leave with things they can try in their classrooms right away and with easy ways to monitor and celebrate growth.

Shifting from Word Walls to Sound Walls
Keegan Wilson, Hand2Mind

Are you hearing more about sound walls and ready to make the transition in your own classroom? Join us for a session where we will explore the importance of sound walls backed by research from many well known in the structured literacy and Science of Reading community. We will also dive into how to implement them for enhanced engagement. Participants will have the opportunity for several sound wall resource giveaways.

PK and Elementary

Discipline Literacy: What Is It?
Charlene Aldrich, Heather Hall, Brooke Hardin, Jennifer Morrison, & Rachelle Savitz

Disciplinary literacy (DL) prompts teachers to see literacy as a set of tools, strategies, and practices specific to a discipline's reading, writing, processing, comprehension, communication, and production. In this session, we will examine asset-based DL in social studies, English language arts, mathematics, science, physical education, and the visual/performing arts, including examples of lessons, materials, practices, and texts.

Boring Nonfiction Books? No Way!
Steve Swinburne, Featured Author
Do all the elementary visitors head straight to the fiction section in your library? Is your elementary nonfiction not circulating? How can teachers use more nonfiction books to support their curriculum units? The days of boring, joyless, and stale nonfiction are ancient history. The new wave of kidlit nonfiction is filled with drama, excitement, and unbridled creativity. And heart! This session showcases the modern, compelling, and exciting nonfiction published today; nonfiction that will foster a child’s curiosity and kickstart a love of reading! Join Steve, recently nominated for a CBC-NSTA STEM Best Book of 2024 (Giraffe Math), as he presents on amazing nonfiction.

Authors on the Move – Lunch Event
David Biedrzycki, Victoria Benton Frank, Tim Hunter, Ann Lilly, Tim Lowry, Tara Luebbe, Angela May, Steve Swinburne, Susan Riley Diamond & Helen Wilbur

Have you ever wanted to have a dinner conversation with an author? Well, here’s your chance! Join the fun as TEN authors are showcased during this featured event. Authors will join you at your table while you enjoy lunch. This unique event provides an opportunity to learn about books directly from the author. This event includes the author presentations, a bagged lunch, and one signed book from the author of your choice. $15.00 and registration required. The fee, not covered in the cost of conference registration, will pre-purchase the book of your selected author. Please use this Google Form to register for this event and choose an author. *Note: Due to the organizers purchasing books in advance, the $15 fee is non-refundable if you cannot attend.

**Negotiating Literacy Practices and Policies: Posing Possibilities**
Rachelle Savitz & Lucy Spence

Last year, we asked participants what they wanted to explore from a research and theory perspective. Common responses referenced current practices and policies that impact teachers and their students. Presenters will share teacher educator perspectives on negotiating new policies currently impacting classrooms. Speakers will draw upon research and theory to share what good instruction looks like in classrooms and schools, including challenges, successes, and resources. We anticipate addressing 3rd-grade retention laws, book banning, missing voices from curricula, and required literacy programs and practices. This session will provide a space for affirming voices and alternative perspectives on what is happening in South Carolina classrooms.

**Make Your Brains Shimmer with Phonics**
Kimberly Tisi, Hannah Norris, Alexis Tuten, Emma Lambrecht, Elizabeth LaFlamme,
& Patricia Massengale, Anderson University

Is your Phonics routine lacking sparkle? Phonics can be exciting while easily supporting diverse learners – our hidden gems! By incorporating evidence-based practices into any phonics routines, teachers can create a dazzling learning environment filled with phonics fun. Utilizing movement, songs, games, and one-of-a-kind books will transform an average phonics routine into a shimmering diamond. Attendees will discover practical and hands-on activities that will shine in the classroom.

| **Literacy's Gems= Representation + Inclusion + Building Knowledge**  
Benchmark Education |

During this interactive session the focus questions will be: How can we as educators mitigate some of the external factors that adversely affect teaching and learning by becoming more culturally sustaining in our use of story and trade books? How will that mitigation increase student learning and disrupt disproportionality by giving our students a sense of belonging while expanding their perspectives?

| General |
Write from the Beginning
Dr. Rebecca Harper, Featured Speaker

It’s never too early for writing! Even our youngest students can be writers. In this session, participants will take part in hands-on literacy strategies that foster writing in the primary classrooms. See how you can use slinkies, animal crackers, paint strips, and more for exciting writing lessons.

Primary

When What You’ve Done in the Past Doesn't Work Anymore: Instructing Research and Communications through the 2023 ELA Standards and Cross-Curricular Content
Tabatha Hughes, Mandy Hocker & Breanna McCormick, SC Department of Education

Are you tired of spinning your wheels trying to figure out how to teach inquiry, research, and proper communication to your students? Is it an effort to get your students interested in anything other than non-academic activities? Perhaps it’s time to clean out your old toolbox in favor of some new educational tools. Participants will leave this session invigorated with new ideas, strategies, and instructional techniques for utilizing cross-curricular content to teach Research and Communication.

General

The New SC ELA Standards and Students with a Disability
Angie Neal, SC Department of Education

This session will outline what general education teachers need to know about the new SC ELA standards and struggling readers including students with a disability. This presentation will also include information related to accommodations and modifications for students with a disability.
## General

### The Promise and Perils of AI
Carol Jago, Featured Author (Sponsored by HMH)

ChatGPT and artificial intelligence have thrown many writing teachers into a quandary. While recognizing the remarkable tools that AI provides, we worry about what may be lost. This session invites teachers to explore the promise and perils of artificial intelligence. Learn how teachers are using these tools to improve student learning while avoiding or mitigating the harm.

### Unlocking the Science of Reading
Dr. Carol Connor, Scholastic

The Science of Reading comes from decades of research on what proficient readers must know and be able to do. In support of teachers trying to organize all the research into classroom instruction, Dr. Carol Connor studied the actions of students in classrooms and evaluated what students who were making gains were doing. This research has helped teachers organize instruction into 4 quadrants and “Unlock the Science of Reading.” In this session we will discuss these 4 quadrants of literacy teaching and learning. Participants will be able to describe the fundamental principles of the Science of Reading and Identify strategies to individualize instruction using the Science of Reading principles through content, context, and time.
**Writers Gonna Write: Motivating the Writer in All Students**  
Melissa Ewing, Spartanburg District Two,  
Elizabeth Crocker & Courtney Kozelski, University of South Carolina

We conducted action research on instructional sequences for transforming literacy spaces. What we learned about contextualized and personalized learning, along with SEL strategies, can be adapted for any classroom. We will share easy-to-use instructional practices

Primary, Elementary and Middle

**From Guided Reading to the Science of Reading – What Happens at the Small Group Table?**  
Caitlin Padget, Letterland

As you are learning about the Science of Reading, do you find yourself asking, “what takes the place of Guided Reading at the small group table?” Join this session with Letterland to learn what small group instruction looks like based upon the science of teaching reading. Differentiated instruction, progress monitoring, and engaging, child-friendly strategies will be demonstrated. Learn how to replace leveled readers by incorporating decodable text into a small group plan.

**Using Discovery Education to Support Growing Readers**  
Andrea Lance, Discovery Education

All SC educators have access to Discovery Education through the SCDE Instruction Hub. In this professional learning, using state-specific standards and the Discovery Education K-12 Learning Platform, this session will provide teachers with the planning tools
to engineer learning experiences that provide students with routine experience with complex texts. This hands-on session will immerse participants in a variety of strategies that use multimodal texts as scaffolds for growing readers.

General

STOP–It’s Integration Time!
Amanda Thomas & Jenna Pinckney, Spartanburg District One

Teachers are often grasping at every spare minute we can get our hands on. Between all the things required of us, it seems impossible to do it all. Science and social studies aren’t core content areas, so they’re typically the first subjects to get cut if your schedule gets off. However we don’t want our kids to miss out on learning about all the subjects! So how can we do it all? INTEGRATE! In our session we’ll give you 5 tips to integrate science and social studies into your literacy workshop.

Elementary and Middle

Lunch & Learn with Oliver James
12:00–12:45 p.m.
Oliver James, Featured Speaker

Oliver James is a TikTok sensation and motivational speaker. In his TikTok videos, Oliver often introduces himself by saying “I’m a 35-year-old man who struggles with reading.” However, it wasn’t long ago that he would say “I can’t read.”
Palmetto State Literacy Association
The 48th Annual PSLA Conference
The Many Facets of Literacy: Mining the Hidden Gems
February 22–24, 2024

*Note: There may be session updates before or during the conference. Please make sure you stay connected and check our social media platforms for updates.

He opens up about many deep struggles he has gone through with learning to read and his mental health. His story has been so inspiring that he ended up being interviewed on ABC’s Good Morning America, the Rachael Ray Show, NPR, and other major outlets. He was also recently featured in People magazine. In October, he was awarded the 2023 National Literacy Honors Award by the Barbara Bush Foundation for the light he has shed on being functionally illiterate. *Participants must pre-register for this event as space will be limited.

General

Ready, Set, Go! Unlocking the Power of Decodable Readers
Jennifer Hamrick & Lori Poole, Lexington District One

Are you ready to unlock the power of decodable readers in your classroom? After learning about the power of decodable readers, teachers will leave the session with a planning tool to enhance small group instruction. This session will hinge on a three step approach to small group instruction, which provides teachers with a structure to guide students in reading decodable texts with varying levels of support. Participants will return to their classrooms ready and prepared to grow their readers.

Kylene Beers, Featured Author

Empowering our Learners: Data Doesn’t Always Determine Success
Dr. Kim Johnson, Everyday Coaches

This interactive session will remind participants about the power of data but also the depth of self-talk and positive reinforcement. Participants will gain knowledge that will help them balance the research and the learning process. Dr. Kimberly
Johnson will remind you that even though data is needed, you have to be intentional with what to do with the information. She will share her experiences of growing up in a household that was not driven by the perils of data but used other factors to help elevate her toward success. These same factors can exist and do exist in the children who are served today. You must be willing to look for these factors and stand up for the most vulnerable of our learners. Dr. Kim will also remind you why you can’t throw in the towel and how you can step up and regain your energy and passion through seeing data from a different lens. This recharge session will help you navigate both your personal and professional lives in a more realistic and achievable manner. Come ready to listen, to laugh and to LIVE – knowing that data is just one tool to help measure success!

**Peer Editing: Finding a Diamond in the Rough**  
Judy Arnold & Tiffany Smith, Spartanburg District Two

Move your students from "sounds good" or "it could be a little neater" when peer editing to become a writing gem for their classmates. We will show you how we use peer editing in our middle school classrooms to build a community of writers willing to share their work in a safe space. Peer editing also allows students to glean ideas from each other, use and give constructive feedback, communicate effectively, and improve his or her own writing skills.

| **Mining Hidden Social Studies Gems within Literacy Instruction**  
Jayson Evaniuck, Anderson University |

Due to time constraints, elementary teachers often thoughtfully and artfully integrate Social Studies within literacy instruction. This session will present poetry and literature integration approaches embedded within a new elementary Social Studies teaching methods course design. Larger social goals and the ten National Council for Social Studies strands will be utilized as a guide for meaningful integration of Social Studies within literature blocks.

Primary and Elementary
Differentiating Instruction with Teaching Books
Kym Davick, Teaching Books

Explore titles on Teaching Books with lessons designed to support differentiated learning styles, scaffold instruction, guide reflection, and build connections to texts for K–12 readers. TeachingBooks is provided to schools, colleges, public libraries, and residents by Discus, South Carolina’s Virtual Library. Use the resources to locate qualitative and quantitative data for titles, analyze book lists to extend differentiation, provide inclusive experiences with multi-leveled lessons, and empower independent choice.

Mining the Hidden Gems of Emergent Literacy with Rhymes through Play!
Angela Compton & Lynn Kuykendall, South Carolina Department of Education

Nursery Rhymes matter! “If a child knows 8 nursery rhymes by the time they are four-years-old, they are usually among the best readers and spellers in their class by the time they are eight.” (Mem Fox, *Reading Magic*) In this session, participants will experience the power of nursery rhymes through purposeful play and discover how to support the crucial building blocks of emergent literacy as the foundation for children’s success as readers and writers.

Primary

Need a Friend? A, I Have One for You!
Ann Aust & Dr. Lori Vinson, North Greenville University

In the ever changing world of technology, Artificial Intelligence (AI) has surfaced as a shiny, new tool for many students and teachers. AI has been around for many years. In this session, educators will be introduced to AI, gain a basic understanding of how it works, and learn about the many benefits of its use as it relates to literacy. Create lesson plans and assessments that align with literacy standards in minutes and utilize research to enhance your instruction.

</tr>
</tbody>
</table>

Much attention has been paid to developing the skills of young readers in current reform efforts while the needs of upper elementary and adolescent students have been largely ignored. This session will examine practical strategies to address common issues of older readers and writers. Participants will leave with a framework for developing a literacy-rich classroom that moves students not only on the academic scale but also in their love of literacy.

**Elementary, Middle and High**

| *Getting Graphic: Utilizing Graphic Novels in Secondary ELA* |
| Scarlett Pack & Kimberly Smith, Spartanburg District Two |

As Sam Wineburg states, "...the old ways of reading won’t do. We'll need new ones to cope with the mountains of information that threaten to bury us each day.” New strategies can be found in utilizing graphic novels to unearth students’ abilities to dive deeply into the vast amounts of content they encounter and to effectively communicate their understanding. This session aims
to show how pairing images alongside text helps students of all reading levels develop verbal and visual literacy. Middle and High

| **Partnering with Families to Improve Literacy**  
Sherrie Jeffries, Spartanburg District Seven |
---|
Research has shown that partnerships between schools and families can lead to improved student achievement. Engaging parents in their children's literacy development can also lead to increased reading and writing skills for students. This session will explore strategies used to successfully engage parents at both the community level and school level (Title 1 schools), equipping them to be literacy leaders at home. We will also share how this engagement has benefitted students.  
PK, Primary and Elementary

| **Making Books Come Alive with Music**  
Jo Hackl |
---|
We all know that students learn in a variety of ways. Attendees will learn evidence-backed ways to engage students by creating a chapter-by-chapter playlist of the book they are studying, with a narrative explaining the connection between the song and the chapter. The session also includes best practices, resources, and tips to get started.  
Elementary, Middle and High |
**Uncovering Three Big Ideas within Science of Reading: The Why, The What, and The How**  
Dr. Diana Betts, 95 Percent Group

This session addresses the compelling call to action that all children deserve access to high-quality, evidence aligned literacy instruction by exploring these big ideas:  1. Learning to read is not a natural skill; 2. There are key conceptual models which can inform our understanding of the process of reading so that instruction can be effectively delivered and assessed 3. There are five “must-haves” for educators to embrace in order to deliver on the promise.

PK, Elementary and Middle

**CDQs & TDQs: The Art of Scaffolding Questioning**  
Breanna McCormick, SC Department of Education

This session will provide an overview of two types of questions: collaborative discussion questions (CDQs) and text-dependent questions (TDQs). Participants will learn the difference between and purpose of each type of questioning. In addition, participants will learn to write TDQs based on grade-level indicators from the 2023 SC CCR ELA Standards and CDQs as a scaffold to prepare students to independently answer TDQs. Emphasis will be placed on aligning questions to the rigor, content, and skills expected by grade-level indicators.

*Beyond the Wall: How to Use a Scope and Sequence to Build a Sound Wall*
Keegan Wilson, Hand2Mind

Are you wanting to implement a sound wall but you are unsure where to start? In this session, we will use a scope and sequence to build a sound wall. The scope and sequence will cover K–2nd and we will identify the sounds addressed at each grade level. After teaching a specific sound from the scope and sequence then we will have an interactive lesson including all 5 pillars of literacy instruction.

**PK and Primary**

*Teacher Researcher Panel: The Research to Practice Strand & the Role of Research in Schools and Classrooms*
Catherine Compton-Lilly, PSLA Literacy Leaders Session Chair,
Melissa Ewing, Spartanburg District Two,
Valente Gibson & Aisja Jones, Richland District Two &
Cathy Jones-Stork, Lexington District Two
This session will not only serve as an introduction to the 2024 Research Practice Strand, but it will also feature a panel of educators who will speak about the role of research in schools, classrooms, and curricula. Panelists will address: What is meant by research to practice and how might research findings inform literacy instruction? What qualifies as research? How are different types of research useful to practitioners? What does it mean to be research-based or scientific? What are the contributions of practitioner action research and teacher inquiry?

Student-Centered Book Clubs: A Multifaceted Treasure that Uncovers the Ability Within All Readers
Sarah Brower, Spartanburg School District Six &
Alyssa Likens, Greenville County Schools

Join us to explore the use of book clubs in the classroom to promote collaboration, foster critical thinking skills and implement meaningful reading instruction for all students. Participants will learn ways to start book clubs in their own classrooms by focusing on student choice and instructional needs. Presenters will share instructional strategies and classroom examples for incorporating technology, writing and content area integration into student centered book clubs.

Primary, Elementary and Middle

Creating a Multicultural Classroom through Literature
Jaclyn Wallace, Lexington–Richland District Five
Participants will gain useful strategies, book suggestions and standards based research projects to represent the various cultures in their classroom and/or school. When educators promote inclusion and understanding, it will lead to student acceptance of all cultures.

**ARTificial Intelligence and the Authorator**  
David Biedrzycki, Featured Author

South Carolina Picture Book nominee, Authorator (50% author, 50% illustrator) David Biedrzycki, takes you behind the scenes of his newest picture book, ARTificial Intelligence. Asked by his publisher not to share until it’s published next October, he’s throwing caution to the wind and letting you experience it now. A labor of love more than 5 years in the making, ARTificial Intelligence, is a story about a robot designed to work in a warehouse but unexpectedly finds out he was destined for something greater. From the adventure’s idea seed to the finished story, highlighted with videos of the art being created and writing decisions being made, there is enough information you could share with students of the creative process of this heartfelt story. David creates his art digitally and will be doing some live demonstrations along with videos.
